

QuickBooks Upload Log

QuickBooks Upload Log is a report that will show you exactly what transactions VinNOW pushed up to QuickBooks and whether or not the upload was successful.

The log will list:

Date/Time of upload- when the upload item was sent to.

Data Type- this will show the type of transaction sent to QuickBooks (e.g., invoice, payment, inventory).

VinNOW ID- The VinNOW ID, could be invoice number, payment number or product ID.

QuickBooks ID- The ID number for the transaction in QuickBooks.

Status - Status is whether or not the information was accepted by QuickBooks and will show success or failure.

Notes: System notes to include error messages **Note: while doing the upload if you get error messages that indicate the upload failed and why, you can ignore that error and continue with the upload then view the error message here in order to resolve the issue and then attempt the upload again.**

Export ID User - the VinNOW user who exported the information to QuickBooks.

Computer- the computer that the upload was run from.

The QuickBooks log is searchable by a daily to date range interval, selection criteria, export ID, data type, VinNOW ID, QuickBooks ID, upload status, notes, user ID or computer.
